MEMORANDUM TO: Col. Edwin L. Wright
Central Intelligence Group
Room 2.80, New War Department Building

1. Attached is a copy of a letter FRIB recently received from the British Radio Equipment Manufacturers' Association. This letter requests that the Association be placed on our mailing list to receive our monthly unclassified publication "Shortwave Broadcasting Stations of the World According to Frequency."

2. FRIB in the past has issued single copies to American manufacturers, but this is the first instance of a request from a foreign manufacturer. I would appreciate your advising me whether the policy of GIG will permit our complying with the attached request.

The Officer-in-Charge,
Broadcast Information Section,
Foreign Broadcast Intelligence Service,
War Department,
1424 K Street, N.W.
Washington, D. C.
U.S.A.

Dear Sirs:

I have just perused with great interest a copy of your publication entitled "Short wave Broadcasting Stations of the World according to Frequency", which has been loaned to me.

This document contains most valuable information, which is of interest to radio set manufacturers when calibrating tuning scales on sets intended for overseas markets.

The British Radio Equipment Manufacturers' Association represents the leading set makers in the United Kingdom, and one of its functions is to keep its members supplied with details regarding the frequencies of broadcasting stations throughout the world.

In view of the valuable information given in the above mentioned Book, I would like to receive copies of this as and when they are issued.

I shall be glad, therefore, if you will advise me whether you could forward a copy direct to me each month or alternatively let me know if I could obtain one in this country. Any expense incurred would, of course, be met by the Association.

Yours faithfully,

/s/ B. A. Pollit
for Secretary.
